- ▶ Voice and Data Networks
- ▶ Cloud Migration
- ▶ VoIP Business Phone Systems
- ▶ Telecom Services Management
- ▶ Contract Renegotiations
- ▶ Structured Cabling

"With our new Star2Star phone system, we are able to better serve our members and route their inquiries properly. The cordless VoIP phones have also given our staff more flexibility to provide a better member experience. ATC did an excellent job redesigning our voice network and deploying the system. All three of our facilities will soon be connected and the system is now cloud-based, giving us inherent back up."
